

Code snipt

```
int f(int n = 0);  
ff::paragroup pg;  
pg.for_each(0, 100, f());
```

Compiler error messages

```
main.cpp:11:27:   required from here  
../para/paragroup.h:201:11: error: static assertion failed  
The 3rd parameter should be callable, maybe a function
```
