

代码片段

```
ff::para<> p1;  
ff::para<> p2;  
// ...  
p1[p2].then([]()...);
```

编译错误信息

```
main.cpp:30:27:   required from here  
.../para/para_accepted_wait.h:49:7: error: static assertion failed:  
You can only call *then* right after calling operator(...), like this,  
para<> a;  
a[b]([]()...).then(...);
```
