```
int g_counter = 0;
void task_fun(int i){
    g_counter ++;
    ms[g_counter%2].lock();
    if( is_odd(i)){
        ms1[i].lock();
    }else{
        ms2[i].lock();
    }
    ...
}
```
